Company & Vision

Introducing V2R Aviation

Company Overview

V2R Aviation is a new company in Andorra la Vella. It wants to change how people move with the SkyRide, the world's first real flying motorbike.

Target Market

We target rich people, collectors, and premium motorbike concessionaires. Our product appeals to those who value exclusivity and innovation.

Vision

Our vision is to set new standards in luxury transportation by offering a product that combines motorcycling with the freedom of flight.

SkyRide Product Overview

Technical Specifications

The SkyRide is a two-seat bike that can go straight up into the air. It can change from a road bike to a flying machine in only 30 seconds. It can fly at 250 km/h and drive on the road at 150 km/h.

Safety and Design

The SkyRide is made with a strong and light carbon-fiber body and uses both fuel and electric power. It has modern flying controls and extra safety systems. This makes it very safe, reliable, and a luxury vehicle.

02

Market & Customers

Target Customer Segments

Rich People

Our main buyers are very rich people who want special and exciting experiences. They like luxury and are happy to pay more for something unique.

Luxury Motorcycle Shops

We also work with top motorbike shops that will show the SkyRide as their main product. These shops serve customers who like high-quality motorcycles.

Private Collectors

Private collectors are another important group. They want to buy special aerospace items, so the SkyRide is a great piece for their collections.

Market Positioning

These groups don’t worry much about price and really like new luxury ideas. By focusing on them, we make the SkyRide a symbol of status and a special investment.

Market Opportunity Size

Market Potential

The world markets for luxury motorcycles and light-sport aircraft each make more than two billion dollars every year. In this group, around 3,000 people can afford vehicles that cost more than €500,000, which is a big business opportunity.

03

Financial Plan

Startup Capital Requirements

01

Funding Needs

V2R Aviation requires 50 million USD over twenty-four months to finalize certification, build the initial production line, secure suppliers, and fund working capital. This investment is crucial for our launch.

02

Funding Allocation

The funding will be allocated as follows: 40% for R&D and certification, 30% for tooling and manufacturing setup, 20% for regulatory and legal expenses, and 10% for marketing and contingency.

Year-One Profit

Expected Income

We expect to deliver 100 units in the first year at an average price of 1.2 million USD each, making 120 million USD in total sales. This gives our business a strong start.

Increase in Production

Our production plan can make two vehicles per week. Customers can reserve a vehicle with a 30% deposit, which helps keep our sales steady.

Marketing Strategy

We want to get customers to stay loyal and make our brand strong by delivering early and taking pre-orders. This will help us succeed for a long time.

Five-Year Profit

Profit

The total profit is expected to reach 333 million USD in five years. This comes from deliveries, service plans, and optional custom designs.

04

Location

Location- Andorra la Vella

01

Location Advantages

Andorra la Vella gives easy access to central Europe, low business taxes, and fast export processes. Its airspace is good for testing, and it is close to rich customers, making it a great place for V2R Aviation.

THANKS FOR WATCHING
